PELLETS

RENEWABLE ENERGY SUPPLIED BY NATURE.

01 AT A GLANCE

HASSLACHER NORICA TIMBER'S PELLETS ARE IN BALANCE WITH NATURE

- ⊕ The **natural heating material** is made out of pure, dry sawdust and wood chippings compressed with purely biogenic pressing agents.
- ⊕ These **renewables raw materials** valuably contributes to the conservation of our environment.
- ⊕ The pellets are **CO₂-neutral**; while combusting, they only release as much CO₂ as the tree absorbed during its growth.
- ⊕ They guarantee a **100% reliable supply**, independent from oil and gas and readily available in adequate quantities.
- ⊕ Low-dust, clean, fast and easy refilling.
- ⊕ **Quality control** in accordance to ENplus-A1
- ⊕ **Native coniferous wood from the region** obtained entirely from sustainable forestry management.

SUSTAINABILITY

The HASSLACHER Group stands for a careful use of wood as a resource. Our raw materials come from sustainable and controlled forestry. Our locations are certified according to the strict PEFC™ standards.
